

Table 5: Inner Consistency Among the 9 Criteria (Cronbach Alpha Coefficient)

Criteria	Scale Mean if Item Deleted	Scale Variance if Item Deleted	Corrected Item-Total Correlation	Cronbach's Alpha if Item Deleted	Cronbach's Alpha
1. The ability to better hear myself	5.85	134.909	.250	.902	.884
2. Better ability to sing longer sustained condition	4.09	120.061	.664	.869	
3. Easiness of singing high notes in terms of voice effort	3.83	126.764	.499	.882	
4. My singing feels more beautiful	4.02	111.264	.820	.855	
5. Flexibility of voice in transition between notes	4.27	120.247	.626	.872	
6. Feel comfortable about my singing	3.89	113.780	.812	.857	
7. Feel more correct about my singing	4.02	114.942	.760	.861	
8. Better voice control	4.35	116.760	.686	.867	
9. Accuracy of intonation in singing	4.67	119.350	.613	.874
